

FICHA REPASO

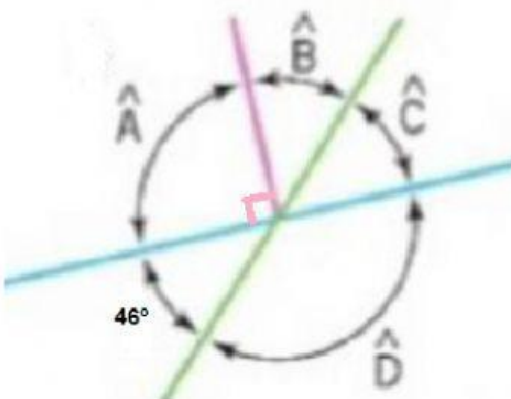

1. Halla el valor de los ángulos que faltan en cada caso sin utilizar el transportador:

$x =$

$x =$

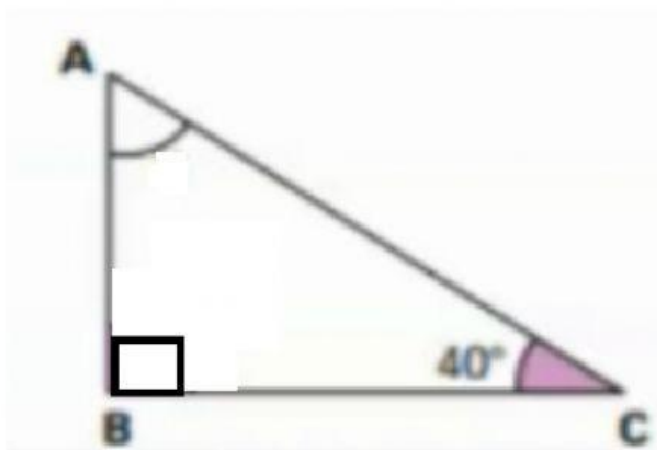

$A = 90^\circ$

$B =$

$C =$

$D =$

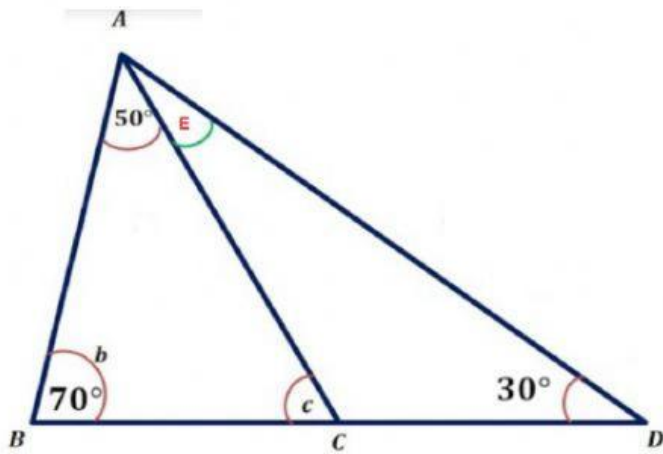

$E = 46^\circ$

$A =$

$B =$

$C = 40^\circ$

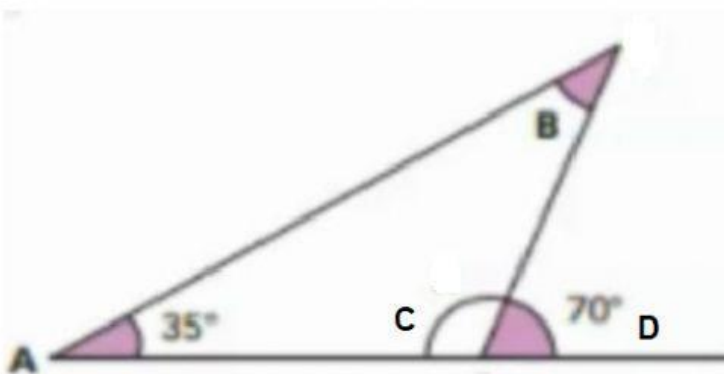

$$A = 50^\circ$$

$$B = 70^\circ$$

$$C =$$

$$D = 30^\circ$$

$$E =$$

$$A = 35^\circ$$

$$B =$$

$$C =$$

$$D = 70^\circ$$

2. Realiza las siguientes operaciones de ángulos:

$$24^\circ 35' 48'' + 12^\circ 27' 36'' = \quad ^\circ \quad ' \quad ''$$

$$30^\circ 15' 3'' - 28^\circ 39' 50'' = \quad ^\circ \quad ' \quad ''$$

$$32^\circ 23' 49'' \times 5 = \quad ^\circ \quad ' \quad ''$$

$$37^\circ 48' 25'' : 5 = \quad ^\circ \quad ' \quad ''$$
