

Mixtures

0

Investigate homogeneous and heterogeneous mixtures.

You need:

- small spoons
- six clear containers
- water
- six different solids (coffee, white sugar, salt, chocolate powder, bread, small balls of plasticine)

What solids form a homogeneous mixture with water?

Half fill a container with water.

Add one spoon of coffee.

Stir and observe if the solid dissolves in the water.

Repeat the procedu with the different solids.

- Discuss the results.
 - Copy the chart and complete with a tick (✓) or a cross (✗).

Solid	Formed a heterogeneous mixture	Formed a homogeneous mixture
Coffee		
White sugar		
Salt		
Chocolate powder		
Bread		*
