

**PART 1** Look and write.

Example:

|                                                                                                  |                              |                                                                                               |
|--------------------------------------------------------------------------------------------------|------------------------------|-----------------------------------------------------------------------------------------------|
| <br><b>five</b> | $11 + 21 = 32$<br>1. _d_tion | <br>2. _ube |
| <br>3. _yli_der | $12$<br>4. _wel_e            |                                                                                               |

**PART 2** Look, circle and write.

|          |                                                                                     |                                       |                      |
|----------|-------------------------------------------------------------------------------------|---------------------------------------|----------------------|
| Example: |                                                                                     | The ... <b>addend</b> ... is 84.      | sum<br><u>addend</u> |
| 1.       |  | The ball is a .....                   | sphere<br>square     |
| 2.       | $15 + 63 = 78$                                                                      | This is an addition ..... regrouping. | without<br>with      |
| 3.       | $12 + 8 = 20$                                                                       | ..... is an addend.                   | Twenty<br>Twelve     |
| 4.       |  | Cone is a ..... shape.                | 2D<br>3D             |
