

Ćwiczenia Pola wielokątów str. 59

1. Oblicz pola narysowanych wielokątów.

a) równoległoboki

$$\text{Pole} = 9 \cdot 10 = \dots\dots\dots$$

$$\text{Pole} = \dots \cdot \dots = \dots$$

$$\text{Pole} = \dots \cdot \dots = \dots$$

b) romby

$$\text{Pole} = \dots \cdot \dots = \dots$$

$$\text{Pole} = \dots \cdot \dots = \dots$$

$$\text{Pole} = \dots \cdot \dots = \dots$$

c) trójkąty

$$\text{Pole} = \dots \cdot \dots = \dots$$

$$\text{Pole} = \dots \cdot \dots = \dots$$

$$\text{Pole} = \dots \cdot \dots = \dots$$

d) trapezy

$$\text{Pole} = \frac{(1 + 3) \cdot 4}{2} = \dots$$

$$\text{Pole} = \frac{(2 + 6) \cdot 3}{2} = \dots$$

$$\text{Pole} = \frac{(2 + 5) \cdot 5}{2} = \dots$$

2. Przyjmij, że bok kratki ma długość 1. Oblicz pola narysowanych wielokątów.

Pole = $\frac{2 \cdot 2}{2} =$

Pole = $\frac{(2 + 4) \cdot 2}{2} =$

Pole = $\frac{2 \cdot 3}{2} =$

Pole = $\frac{2 \cdot 2}{2} =$

Pole = $\frac{2 \cdot 2}{2} =$

Pole = $\frac{4 \cdot 1}{2} =$

Pole = $\frac{4 \cdot 2}{2} =$

Pole = $\frac{2 \cdot 2}{2} =$

Pole = $\frac{4 \cdot 2}{2} =$

Pole = $\frac{(2 + 4) \cdot 2}{2} =$

Pole = $\frac{(1 + 2) \cdot 2}{2} =$

Pole = $\frac{2 \cdot 2}{2} =$
