

Progresiones aritméticas

En cada ítem se dan los tres primeros términos de una progresión aritmética (a_m). Halla el término general de dicha progresión, y calcula el término a_m que se indica

$$1, 5, 9, \dots, a_{10} =$$

$$-20, -15, -10, \dots, a_{15} =$$

$$1 - \sqrt{2}, 1, 1 + \sqrt{2}, \dots, a_8$$

$$\frac{1}{2}, 1, \frac{3}{2}, \dots, a_{20} =$$

$$u_{n+1} =$$

$$a_{20} =$$
