NAME : SECTION : ROLL No.

Q. Multiple choice questions:-

(a) What is the area of rectangle whose length is 12 cm and breadth is 9 cm?

(i) 144 cm^2 (ii) 108 cm^2 (ii) 81 cm^2

(b) What is the area of square whose each side is 14 cm?

(i) 56 cm^2 (ii) 28 cm^2 (ii) 196 cm^2

(c) What is the area of rectangle whose length is 31 cm and breadth is 4 cm?

(i) 124 cm^2 (ii) 16 cm^2 (ii) 35 cm^2

(d) What has greater area, a square of side 15 m or a rectangle of length 5 m and breadth 3 m?

(i) square (ii) rectangle (ii) equal

(e) What is the area of square whose each side is 16 m?

(i) 64 m^2 (ii) 256 m^2 (ii) 32 m^2

(f) What is the area of rectangle whose length is 32 cm and breadth is 12 cm?

(i) 44 cm^2 (ii) 123 cm^2 (ii) 384 cm^2

(g) If the perimeter of a square is 64 cm, then what will be each side of the square?

(i) 4 cm (ii) 256 cm (ii) 16 cm

(h) If the perimeter of a square is 48 cm, then what will be its area?

(i) 144 cm^2 (ii) 108 cm^2 (ii) 81 cm^2

(i) What is the perimeter of rectangle whose length is 32 cm and breadth is 8 cm?

(i) 256 cm (ii) 80 cm (ii) 40 cm

(j) What is the breadth of rectangle whose length is 23 cm and area is 184 cm^2?

(i) 144 cm (ii) 108 cm (ii) 81 cm

(k) What is the area of rectangle whose length is 21 cm and breadth is 19 cm?

(i) 40 cm^2 (ii) 399 cm^2 (ii) 80 cm^2

Q. A square postal stamp of 2 cm each side has to be used to measure the perimeters and areas of the following squares and rectangles:-

(i)

Perimeter = _____ cm

Area = _____ cm^2

(ii)

Perimeter = _____ cm

Area = _____ cm^2
