

OPERACIONES COMBINADAS

Para resolver las operaciones combinadas necesitamos seguir en orden los siguientes pasos:

- PASO 1: Realizar las operaciones que estén dentro de los paréntesis si los hubiera.
- PASO 2. Realizar las multiplicaciones y divisiones que aparezcan.
- PASO 3. Realizar las sumas y las restas que aparezcan.

1. Calcula

a) $5 + 3 + 7 \times 2 =$

$5 + 3 +$

Red arrows indicate the order of operations: first from 7 to 2, then to the multiplication sign, then from 5 to 3, and finally to the addition sign.

c) $26 - 6 \times (7 - 3) =$

$- \quad \times$

Red arrows indicate the order of operations: first from 7 to 3, then to the subtraction sign inside the parentheses, then from 6 to the multiplication sign, and finally to the main subtraction sign.

b) $3 \times (6 - 2) - 10 =$

$\times \quad -$

Red arrows indicate the order of operations: first from 6 to 2, then to the subtraction sign inside the parentheses, then from 3 to the multiplication sign, and finally to the main subtraction sign.

d) $5 \times (5 - 3) + 2 \times 5 =$

$\times \quad +$

Red arrows indicate the order of operations: first from 5 to 3, then to the subtraction sign inside the parentheses, then from 5 to the multiplication sign, then from 2 to 5, and finally to the addition sign.

$$e) 6 + 4 \times 3 + 5 \times 4 - 15 =$$

$$f) 20 - 2 \times (4 + 5) =$$

$$g) 2.340 - (400 + 300) =$$

$$h) 2.340 + (400 - 300) =$$
