

My Family Tree

Two years 1 (since / ago / later), I wanted to learn more about my family. A family tree shows the history of a family from the past to the present, so I decided to 2 (spend / take / follow) my spare time finding out about my own family.

I thought I'd see what I could find out by talking to my grandmother. She told me about my great, great grandfather. He was an explorer 3 (which / whose / what) job involved travelling to different countries to sell spices. She also told me that my great uncle was a 4 (high and slim / tall and thin / long and narrow) man who used to work as a pearl diver. He was 5 (lived / lives / living) in Oman at the time. I never knew that any of my relatives lived outside of the UAE 6 (in the past / on the end / at the finish) .

I've already 7 (been / being / to be) told so many facts about my family, and I know there's still more to discover! It's been 8 (some / such / so) exciting that I'd 9 (want / think / recommend) that everyone research their family tree so they can discover interesting things about their relatives too.
