

Activity 6

Ahmed is learning about making improvements to computing devices.

Create a sketch to show possible improvements to a **laptop** based on the analysis of user interaction.

Remember, a range of issues have already been identified:

- Cooling vents on the device could be blocked when it is on the user's lap.
- Resting the device on the user's lap could be uncomfortable.
- Position of the screen is always lower than the user's eye line.
- Lack of support for the user's wrists when using the keyboard or trackpad.
- Difficult to transport without using a case or bag.

Explain the improvements included in your sketch of a laptop.

Write your answer below.
