

A Real Scientist

Ray carried his science project to school. He was careful not to trip and drop it. The science project took him weeks and weeks to finish.

In the school hall, Ray set up his project and waited for the judges. Finally, they came to him. They asked Ray a lot of questions. Ray answered them all. Then with a smile, one judge stuck a blue ribbon on Ray's project. First place!

"Way to go!" thought Ray. "Now I'm a real scientist!"

2 Read and choose.

- 1 Why was Ray careful on the way to school?
