

Pikkus- ja pindalaühikute teisendamine

1. Teisenda pindalaühikud. Kui oled unustanud, kuidas seda teha siis tuleta meelde [LINK](#)

$$1\text{ m}^2 = 10\text{ dm} \cdot 10\text{ dm} = 100\text{ dm}^2$$

$$1\text{ m}^2 = \dots\dots\dots\text{ cm} \cdot \dots\dots\dots\text{ cm} = \dots\dots\dots\text{ cm}^2$$

$$1\text{ dm}^2 = \dots\dots\dots\text{ cm} \cdot \dots\dots\dots\text{ cm} = \dots\dots\dots\text{ cm}^2$$

$$1\text{ km}^2 = \dots\dots\dots\text{ m} \cdot \dots\dots\dots\text{ m} = \dots\dots\dots\text{ m}^2$$

2. Märgi kujundid, mille suurus on 5 m^2 ? Joonisel üks ruut on 1 m^2 .

3. Teisenda pindalaühikud.

Mõtle nii: „Kui $1\text{ m}^2 = 100\text{ dm}^2$, siis
 $4\text{ m}^2 = 4 \cdot 100\text{ dm}^2$. See on 400 dm^2 !“

$$4\text{ m}^2 = \dots\dots\dots\text{ dm}^2$$

$$73\text{ m}^2 = \dots\dots\dots\text{ cm}^2$$

$$85\text{ dm}^2 = \dots\dots\dots\text{ cm}^2$$

$$14\text{ km}^2 = \dots\dots\dots\text{ m}^2$$
