

### Exercise 3

Look at the chart again. Complete the sentences. Use the words in the box.

---

The pie chart below shows the readership of print newspapers by five different age groups in a European country.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

as      far      from      more      so      too

1. Compared to the oldest age group shown in the chart, young people under 20 years old are \_\_\_\_\_ less likely to read news publications in their traditional paper-based format.
2. The newspaper reading habits of the working-age population (20- to 59-year-olds) as a whole are not that different \_\_\_\_\_ those of 60- to 79-year-olds.

3. The ratio of people reading print newspapers in the 20 to 39 age range is the same \_\_\_\_\_ in the 40 to 59 age range.
4. The fact that \_\_\_\_\_ few of those under the age of 20 read paper-based publications is the most striking feature shown in the pie chart.
5. The pie chart shows that people aged 80 and above make up 40% of print newspaper readership, which is 15% \_\_\_\_\_ than those aged between 60 and 79.
6. It is not \_\_\_\_\_ surprising to note that only 5% of newspaper readership in print format is made up of the youngest age group shown in the chart.
