

Nombre: \_\_\_\_\_

## Teorema de tales

Calcula el valor de  $x$  en cada una de los siguientes casos:

|    |                                                              |    |                                                              |
|----|--------------------------------------------------------------|----|--------------------------------------------------------------|
| 01 | <p><math>x = \square</math></p>                              | 02 | <p><math>x = \square</math></p>                              |
| 03 | <p><math>x = \square</math></p>                              | 04 | <p><math>x = \square</math></p>                              |
| 05 | <p><math>x = \square</math><br/><math>y = \square</math></p> | 06 | <p><math>x = \square</math><br/><math>y = \square</math></p> |
| 07 | <p><math>x = \square</math></p>                              | 08 | <p><math>x = \square</math></p>                              |
