

K Give short answers based on the given pictures.

Glass
350 ml

Bowl
700 ml

Mug
250 ml

Flask
1 ℥ 300 ml

The above pictures show four different containers and their capacities.

1. Which container has a greater capacity: the glass or the bowl?

2. Which container has a greater capacity than the bowl? What is the difference in capacity between these two containers?

3. Which container has a smaller capacity than the glass?

4. Which container has the smallest capacity?

5. List the containers in ascending order of capacity.
