- A. three aliens
- B. nothing
- C. the UFO

Read the text below and choose the correct word for each space. For each question, choose the correct options to fill in the blanks. (6 questions)

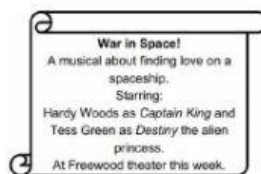

NECESSARY CONDITIONS TO HAVE LIFE ON OTHER PLANETS AND MOONS

Is there life (13)_____ other planets and moons in the solar system? Scientists believe that a moon or planet needs to meet four conditions (14)_____ have life on it. The moon or planet needs liquid water (H₂O) on or under its surface. It also needs to have a temperature that can keep (15)_____ water from turning to gas or to ice, ideally between the (16)_____ of 0°C and 100°C. Scientists also point out that the planet or moon needs (17)_____ to have life, such as oxygen (O₂), nitrogen (N), carbon (C), hydrogen (H), etc. In addition, a thick atmosphere may be better than a thin atmosphere because it can stop space rocks and other dangerous things from hitting the surface of the planet. Some scientists believe that there might (18)_____ life on other moons and planets beside our Earth.
