

## Exit ticket

|               |                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------|-------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Task 1</b> | I can identify inequalities.                                | <p><b>Choose the correct answer:</b></p> <p><b>1) Less than:</b><br/> a) <math>&gt;</math>                      b) <math>&lt;</math>                      c) <math>\geq</math></p> <p><b>2) Greater than or equal to:</b><br/> a) <math>\leq</math>                      b) <math>\geq</math>                      c) <math>&gt;</math></p> <p><b>3) not equal:</b><br/> a) <math>=</math>                      b) <math>\neq</math>                      c) <math>\approx</math></p> |
| <b>Task 2</b> | I can find the possible values of inequalities.<br>(Bronze) | <p><b>Find all possible values of x if:</b></p> <p style="text-align: center;"><b><math>4 &lt; x &lt; 9</math></b></p> <p>x=</p>                                                                                                                                                                                                                                                                                                                                                      |
| <b>Task 3</b> | I can write inequalities in words.<br>(Silver)              | <p><b>Write the following inequalities in words:</b></p> <p style="text-align: center;"><b><math>4 &lt; x &lt; 9</math></b></p> <p>x is greater than .....and .....</p>                                                                                                                                                                                                                                                                                                               |

**Task 4**

I can create my own  
word problem.  
(Gold)

**(Create your word problem in your math  
notebook)**
