For more than a hundred years, film has been one of the world's favourite kinds of entertainment. Films let us (1) _____ adventures in faraway places and see things we have never seen before. In the late 19th century, inventors produced a machine called a kinetoscope. This showed a(n) (2) _____ of images very quickly. After paying a fee, people could look into the kinetoscope and watch the first kinds of film.

The kinetoscope was soon followed by the film projector. Projectors were used in the world's first cinemas. The first films were based on the simple excitement of (3) _____ movement. The subjects were simple, for example moving trains. However, films soon became more (4) _____ and complex. By the 1920s there were many studios producing films, and film stars, including Charlie Chaplin and Mary Pickford, became famous worldwide.

Early films also provided a different kind of service, beyond simple entertainment. Documentary film makers made films about the news, about historical events, about presidents and explorers. These early documentaries helped make people (5) _____ of their world. They informed them of things happening around the (6) _____. In the days before television this was very important and it meant that film was used as a(n) (7) _____ for explaining the world. It offered people a different view of their home planet.

In only a hundred years, film and documentary making have changed dramatically. We can only (8) _____ to imagine what the future of film making holds for future generations.
