Gerardus Mercator

In 1569 Dutch map maker, Gerardus Mercator, published the Mercator map which showed lines of latitude and longitude. The map helped explorers even though the pictures of the continents were very distorted. For example, Greenland was sketched so that it was larger than Africa.

1. Who is Gerardus Marcator?
2. What did the map show?

3. Who is Charles Richter?

4. What did he devise ?

5. Who was the first person reach the North Pole?

6. When did he reach the North Pole?

7. What did Galileo invent?

8. What did he say about the goal of all science?

9. Find picture about Galileo's telescope.
