ECOSYSTEMS

Read the text and fill the gaps with the words above:

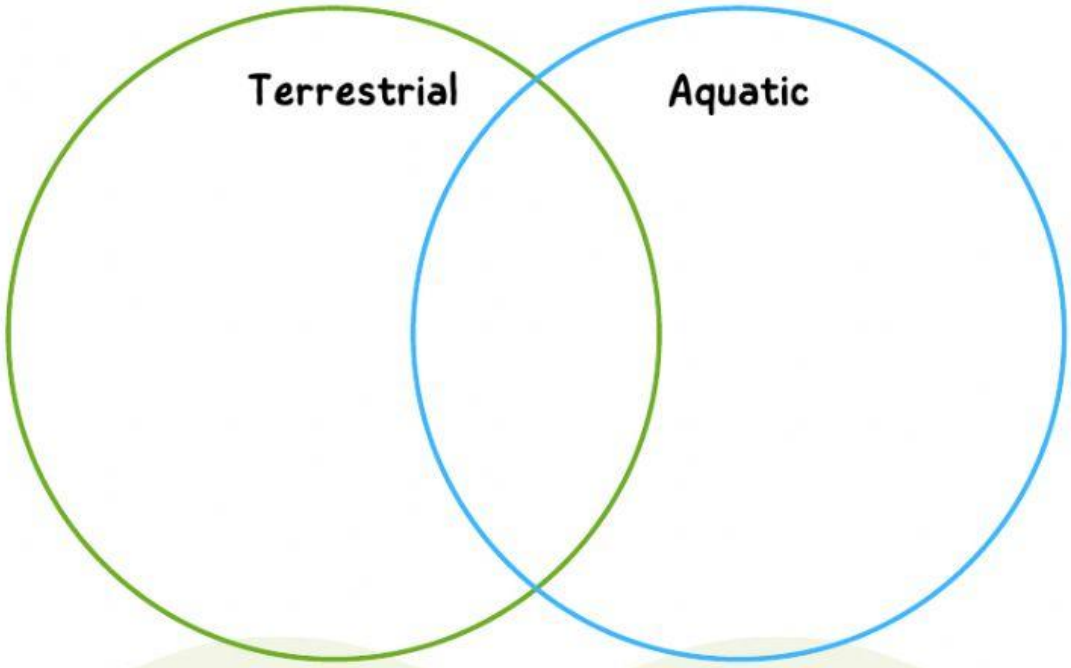

Did you know that in the Toruños Park there are different types of ecosystems?

On the one hand, we have terrestrial ecosystems, such as dunes or pine _____. However, terrestrial ecosystems are less dominant than aquatic ecosystems (70% of the land is water). In addition to this, aquatic ecosystems are usually larger (oceans, seas, lakes...) than terrestrial. Near Los Toruños we have the Atlantic _____, which is larger than the Mediterranean ___.

The main difference between one ecosystem and the other is that in _____ ecosystems animals and plants live on land, while in aquatic ecosystems they are adapted to _____. In both there is a great diversity of flora and fauna, and they are very important for the regulation of the planet's climate.

forests, Ocean, Sea, terrestrial, water
