

## Put each word in the correct place

chlorophyll   elaborated   raw   water   leaves   carbon dioxide   minerals   oxygen   stem

- a The roots absorb \_\_\_\_\_ and \_\_\_\_\_ from the soil. This is called \_\_\_\_\_ sap.
- b The roots transport it up the \_\_\_\_\_ of the plant to the \_\_\_\_\_.
- c Here, \_\_\_\_\_ collects solar energy. The leaves also absorb \_\_\_\_\_ from the air to produce \_\_\_\_\_ sap. The plant releases \_\_\_\_\_ into the air.

## Write a X in the correct place

		respiration	photosynthesis
1	This happens during the day and at night.		
2	This releases carbon dioxide into the air.		
3	This happens only during the day.		
4	This is a process all plants perform.		
5	This is when a plant absorbs oxygen.
