Listen, read and number The Time Travel notes

1 2 3 4 5 6

Scientists know about dinosaurs from the fossils of skeletons, eggs and footprints.

Some dinosaurs were enormous and moved slowly; other dinosaurs were smaller and moved faster.

Dinosaurs became extinct about 65 million years ago but scientists don`t agree why.

There were many different types of dinosaurs.

Some scientists think an asteroid hit the eart; others think the earth got very cold and dinosaurs couldn`t survive.

Dinosasaurs wre reptiles which lived on the earth millions of years ago.

Some dinosaurs were herbivores or plant eater; other dinosaurs were carnivores or meat eaters.
