1 Scientists know about dinosaurs from the fossils of skeletons, eggs and footprints.

2 Some dinosaurs were enormous and moved slowly; other dinosaurs were smaller and moved faster.

3 Dinosaurs became extinct about 65 million years ago but scientists don't agree why.

4 There were many different types of dinosaurs.

5 Some scientists think an asteroid hit the earth; others think the earth got very cold and dinosaurs couldn't survive.

6 Dinosaurs were reptiles which lived on the earth millions of years ago.

Some dinosaurs were herbivores or plant eaters; other dinosaurs were carnivores or meat eaters.
