

# Area of a Kite

To find the area of a kite, is very similar to finding the area of a rhombus

- Use the internal diagonals to find the area  $A = d_1 d_2 \div 2$

**\*Show your work, don't leave spaces, use "/" to show division and ^2 to show squared units**

|                      |    |    |
|----------------------|----|----|
| 1) $A = d_1 d_2 / 2$ | 2) | 3) |
| =                    |    |    |
| =                    |    |    |

|    |    |    |
|----|----|----|
| 4) | 5) | 6) |
|    |    |    |
