

Exam Practice

A) Read the passage and choose the best answer a, b, or c.

Online safety

Your personal safety is important when using the internet. The internet can be a wonderful or a dangerous place if you are not careful. There are several ways to stay safe online.

One of the most important things you can do is to keep your personal information private. Never share your full name, address, phone number, or any other personal information online.

Another way to stay safe on the internet is to be careful about who you talk to online. Never talk to strangers online and be careful about talking to people you don't know well. If someone makes you feel uncomfortable or asks you to do something you don't want to do, tell an adult you trust right away.

It's also important to be careful about what you share online. Think twice before uploading photos or videos online. Photos and videos can stay online forever. Also, anyone can share or use them in online crimes.

Finally, be careful about the websites you visit and the links you click on. Some websites and links can contain viruses or other harmful content. Stick to websites you trust and avoid clicking on links from unknown sources.

By following these internet safety tips, you can protect yourself on the internet.
