

There are many kinds of careers available these days. For me, I wanted to find something that I was really 1. (interested , interesting , interest) in, and because I 2. (has always had , have always had , have always have) an interest in looking after people and helping them to get well, I strongly believed that nursing was the correct choice for me.

3. (So that , So to , So as to) get a job in nursing, I knew I needed to complete a 3-year bachelors degree, followed by a 6-month internship in a hospital, so I enrolled in my local college. Luckily, I 4. (had already learnt , have already learnt , had already learning) the basics of nursing as part of studying Health Science in school, so it was not too stressful at first.

By the time I got to my final year, I 5. (have been studying , had been studying , was studying) hard for 3 long years and I was feeling more 6. (confident , confidence , confidents) than ever. However, I did not stop trying my hardest and studying long hours, because I wanted to make sure that I 7. (had had , have had , hadn't had) the best training possible before finishing my degree.

8. (However, As well as , So as to) being physically demanding, the field of nursing is mentally tough, and so I was glad that I had already experienced this as a trainee nurse as part of my course. If I 9. (not have , haven't have , hadn't had) the experience while I was training, it 10. (might have been , might be , will might be) a big shock when I got my first job. Being a nurse is my dream come true, and I am so proud of myself for achieving my goals!
