

LISTENING ACTIVITY

KOMODO DRAGONS

1. Read the introduction to get a general idea.

These giant reptiles have been around for millions of years, but scientists didn't study them until about a hundred years ago. Wild Komodo dragons are found only on Indonesia's Lesser Sunda Islands.

They are powerful-looking reptiles with wide, flat heads, rounded snouts, bowed legs, and huge, muscular tails. They have a clumsy, back-and-forth walk, and their yellow tongues flick in and out constantly.

2. Listen and choose the correct answer for each question.

1. **How many Komodo dragons are there in the world?**
 - a) between four thousand and five thousand
 - b) forty-five thousand
