Sandra: "I'm a clothing designer, so I really need to know about new tastes in fashion. Last year I _____ an online group called Fashion Friends. I _____ the site almost every day, and I often _____ messages about the things that interest me. The members often _____ links in their messages, so it's a great way to find out about fashion websites."

Owen: "I'm spending the summer in Europe. I want my friends and family to see all the amazing places I'm visiting, so a few times a week I _____ my photos from my smartphone to a photo-sharing website. Sometimes my friends are online when I do this, so we _____ instant messages to each other. It's fun to 'chat' in real time like this from thousands of miles away!"

Greg: "I'm crazy about music. In the old days I used to buy CDs from music stores, but now I _____ songs from my favorite music sites on the Internet. I've got almost 10,000 songs on my MP3 player now! It's really easy. All you do is _____ a song, singer, or group in the 'Search' area of a music site, and then click on the links until you find what you want."

Michelle: "I spend about four hours a day online. I usually _____ from one website to another without any real plan. I love to find new and different websites about things that interest me. There's so much great information out there, and you never know what you're going to find."
