

1. Label the parts of the flower:

corolla

pistil

calyx

stamens

2. Order the reproduction process:

Then, inside the pistil,
the pollen joins
an ovule to make
a seed.

Finally, the fruit falls
on the ground and
the seed grows into
a new plant.

Next, the petals fall off
the flower and the pistil
grows around the seed
into a fruit.

First, an insect
takes pollen from
a stamen
to a pistil.

3. Label in the correct order:

Photosynthesis

carbon dioxide

sunlight

water

food

minerals

oxygen
