437 + 332 =

		+

Diagram illustrating the addition of 506 and 271 using a grid. The equation $506 + 271 =$ is shown in a blue box. Below it is a 3x2 grid of empty boxes. To the right is a vertical column of three boxes, with a plus sign in the bottom one. Red arrows point from the grid boxes to the column boxes.

Diagram illustrating the addition of 364 and 144 using a place value chart. The chart shows the numbers 364 and 144 aligned by place value. A red arrow indicates the carry-over from the ones column (4 + 4 = 8) to the tens column.

Diagram illustrating the addition of 653 and 257 using a place value chart. The top row is labeled $653 + 257 =$. The chart has three rows and two columns. Red arrows point from the top row to the first column of the result chart, from the middle row to the second column, and from the bottom row to the third column. The result chart has a plus sign in the third row, second column.

736 + 172 =

		+

Diagram illustrating the addition of 481 and 210 using a place value chart. The top row is labeled $481 + 210 =$. The chart has three rows and two columns. Red arrows point from the columns to the right. A red plus sign is in the bottom row of the right column.
