Date: _____

The Water Cycle

Read the following statements carefully and match the terms on the right to the corresponding definitions on the left.

1. The movement of water through the soil
2. The process of water soaking into the soil and rocks from the surface
3. Water that is pulled by gravity across the land's surface

Surface runoff

Percolation

infiltration

Select the correct response for the following.

1. When it is raining outside, the water that is falling down is in what stage of the water cycle?

A. Evaporation
B. Precipitation
C. Condensation
D. Runoff

2. Water that comes from plants and is then released into the air as water vapour is called _____?

A. Condensation
B. Transpiration
C. Evaporation
D. Runoff

Fill in the blanks using the list of terms below. Each term can only be used once.

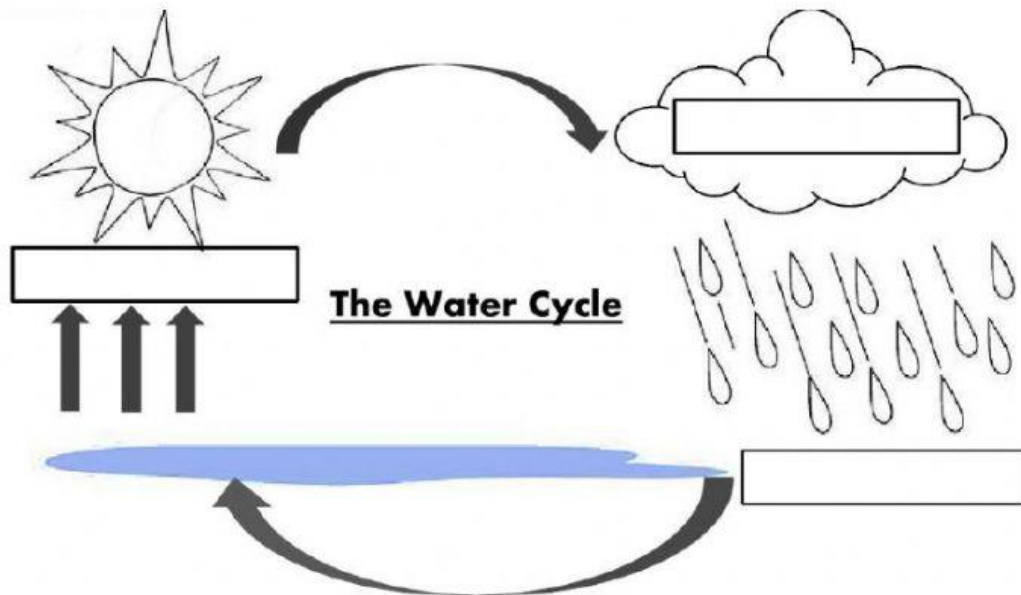

Puddles

Oceans

Precipitation

1. Most of the water that evaporates on earth comes from _____.
2. When the water droplets in clouds become too heavy to stay suspended in the atmosphere, they fall to the earth's surface as? _____.

Drag and drop the correct terms to the space provided in the diagram.

Evaporation

Condensation

precipitation
