GLOBAL ENGLISH 9: UNIT 9 – ACHIEVEMENTS AND AMBITIONS

GRAMMAR REVISION

A. HOMEWORK

***Lưu ý:** Các từ vựng mở rộng thầy cô cho ghi trong vở (nếu có) và các từ vựng mở rộng trong phiếu để có chủ thích nghĩa: con về nhà chép mỗi từ 1 dòng để ghi nhớ nhé.

I. Use *who*, *whose*, *that*, *which* and *where* to combine the sentences. You can use each of them more than once.

0. *That is the man. I spoke to him the other day.*

→ ***That is the man who I spoke to the other day.***

1. They elected a new mayor. His aim is to help the poor.

→ _____.

2. I really like the car. I bought it last year.

→ _____.

3. The restaurant is the best in town. We usually eat there.

→ _____.

4. The film is about a woman. Her son mysteriously disappears.

→ _____.

5. The exercise was very complicated. Nobody could do it.

→ _____.

II. Choose the best answer.

0. *That is the man _____ I spoke to the other day.*

☒ A. *who*

B. *which*

C. *when*

1. Is that your car? No, mine is the one _____ is parked just opposite the bank.

A. *whose*

B. *that*

C. *who*

2. They had to put away the dog _____ bit the boy. It was too dangerous.

A. *which*

B. *who*

C. *where*

3. I'm looking for a person _____ first name begins with a "D".

A. *that*

B. *who*

C. *whose*

4. Avatar, _____ we saw a few days ago, won several Oscars.

A. *which*

B. *that*

C. *who*

5. John belongs to a group of people _____ send food packages to Africa.

A. *which*

B. *where*

C. *who*

III. Complete the sentences with your own idea.

0. That is the man who I spoke to the other day.

1. My friend's father, who _____.
2. The tennis court where _____.
3. The present that _____.
4. The DVD recorder which _____.
5. Where are the shoes that _____?
6. My classmate, who _____.

IV. Fill in the blanks with the correct form of participle clauses.

0. The man who is driving the car is a friend of mine.

= The man driving the car is a friend of mine.

1. Students who hand in their essays late will lose ten marks.
= Students _____ in their essays late will lose ten marks.
2. She only eats cakes that are made by her mother.
= She only eats cakes _____ by her mother.
3. As I knew a little French, I had no difficulty making myself understood.
= _____ a little French, I had no difficulty making myself understood.
4. I get to meet a lot of businessmen because I work as a salesman.
= _____ as a salesman, I get to meet a lot of businessmen.
5. The strawberries that are being eaten at the wedding were grown in Scotland.
= The strawberries _____ eaten at the wedding were grown in Scotland.

V. Write the incorrect word and fix it. Be careful with the context.

0. The man drove the car is a friend of mine.	<u>drove</u> → <u>driving</u>
1. Instead of complained about it, they should try doing something positive.	_____ → _____
2. In spite of read the instructions twice, I still couldn't understand how to use it.	_____ → _____
3. Cutting above the right eye, the boxer was unable to continue.	_____ → _____
4. Be made redundant, she started looking for a new job.	_____ → _____
5. When adjusted the machine, the electricity supply should be disconnected.	_____ → _____

An invention to dye for: the colour purple

A 19th century research chemist was trying to make medicine when, instead, he came up with a coloured dye that has ensured the world is a brighter place.

- A** Of all the colours, purple has perhaps the most powerful connotations. From the earliest cultures to the present day, people have sought to harness its visual power to mark themselves out as better than those around them. From bishops to kings, pop stars to fashion models, its wearing has been a calculated act of showing off. In ancient Rome, for example, purple was such a revered colour that only the emperor was allowed to wear it. Indeed, an emperor who was referred to as *porphyrogenitus*, ('born to the purple') was especially important, since this meant that he had inherited his position through family connections rather than seizing power through military force.
- B** But why purple? At that time, purple dye was an expensive substance produced in a complicated, foul-smelling and time-consuming process. This involved boiling thousands of molluscs in water in order to harvest their glandular juices. The technique had originally been developed by the Phoenicians over a thousand years previously, and it hadn't changed since. Cheaper but poorer quality purple dyes could be made from lichens using an equally messy and unpleasant procedure, but they were not as bright, and the colour quickly faded. It was no surprise, therefore, that good purple dye was a rare and precious thing, and clothes dyed purple were beyond the financial means of most people.
- C** However, times have changed. In the great consumer democracy of the 21st century, even the most humble citizen can choose it as the colour of their latest outfit. For that privilege, we must thank a young 19th century research chemist, William Perkin. A talented 15-year-old when he entered the Royal College of Chemistry in London in 1853, Perkin was immediately appointed as laboratory assistant to his tutor, August Wilhelm von Hofmann. He became determined to prove Hofmann's claim that quinine, a drug used to treat fevers such as malaria, could be synthesised in a laboratory. However, rather than the cure desperately needed for people dying from malaria in tropical countries, he produced little more than a black, sticky mess that turned purple when dissolved in industrial alcohol. Perkin's experiments could have been a complete waste of time, but to his surprise and, ultimately, financial benefit, his purple liquid turned out to be a long-lasting dye that was to transform fashion.

- D** Perkin repeated his experiments in an improvised laboratory in his garden shed, perfecting the process for making the substance he had called mauveine after the French mallow plant. It was, says Simon Garfield, the author of *Mauve* which details Perkin's life and work, an astonishing breakthrough. 'Once you could do that you could make colour in a factory from chemicals rather than insects or plants. It opened up the prospect of mass-produced artificial dyes and made Perkin one of the first scientists to

bridge the gap between pure chemistry and its industrial applications.' It didn't take long for the chemist, still only 18, to capitalise on his creation, patenting the product, convincing his father and brother to back it with savings, and finding a manufacturer who could help him bring it rapidly to the market. The buying public loved it, and clothes coloured with purple started appearing in shops up and down the country.

Appropriately, considering the origins of Perkins' colour, he was to receive a helping hand from the two most important women of the day. Queen Victoria caused a sensation when she stepped out at the Royal Exhibition in 1862 wearing a silk gown dyed with mauveine. In Paris, Napoleon III's wife, Empress Eugenie, amazed the court when she was seen wearing it. To propel the scientist further on the way to a great fortune, the fashion of the time was for broad skirts that, happily for him, needed a lot of his revolutionary new dye.

- E** Perkins, ever the serious scientist, would have been among the first to point out that his mauve is just one of a range of colours described in everyday language as purple. Not itself a true colour of the spectrum – that position is given to indigo and violet – purple normally refers to those colours which inhabit the limits of human perception in the area between red and violet. Newton excluded the colour from his colour wheel. Scientists today talk about the 'line of purples' which include violet, mauve, magenta, indigo and lilac.

F In the alternative medical practice of colour therapy, which practitioners say can trace its origins back to ancient India, the 'purple range' colours of indigo and violet are vital. They refer to spiritual energy centres known as chakras and are situated in the head. The colours and their 'medical' qualities were first officially listed by the Swiss scientist Dr Max Luscher, who said that appropriately coloured lights, applied to specific chakras, could treat ailments from depression to grief. Julia Kubler is one of Britain's leading colour therapists and has been using colours to treat patients at her clinic at Manningtree, Essex, for 15 years. Purple, she says, 'is consistent with intuition and higher understanding, with spirituality and meditation. It combines the coolness of blue with a bit of red that makes it not just passive but active.'

It is hardly the most outlandish of claims for this most enigmatic of colours. Variouslly touted as the colour of everything from insanity to equality, it is enjoying a new role as the symbol of political compromise. Purple may have had its origins in the ancient world, but thanks to a young chemist, it still has a brilliant future.

Questions 1-6

The reading passage has six sections, A-F.

Choose the correct heading for each section from the list of headings below.

List of headings

- i From the laboratory to the High Street
- ii Seeking royal support
- iii An unexpected but fortunate side result
- iv The healing power of purple
- v An old problem
- vi Standing out from the crowd
- vii Finding an alternative cure for a common illness
- viii Part of a larger family
- ix An ancient manufacturing practice

- | | |
|-------------------|-------------------|
| 1 Section A | 4 Section D |
| 2 Section B | 5 Section E |
| 3 Section C | 6 Section F |

Questions 7-10

Choose **TWO** letters, A-E.

Questions 7-8

What **TWO** points does the writer make about the colour purple and purple dye before William Perkin's creation?

- A It was only used to colour clothes.
- B It was originally produced for Roman emperors.
- C It was not easy to make.
- D There were many different techniques used to make it.
- E Some purple dyes were inferior to others.

Questions 9-10

What **TWO** things about William Perkin are true, according to the passage?

- A He taught Chemistry at a college in London.
- B He believed that quinine could be artificially produced.
- C He extracted the substance for his dye from a common plant.
- D He quickly realised the financial benefits of his new creation.
- E He set a new fashion trend for large skirts.

Questions 11-14

Complete the summary below.

Choose **NO MORE THAN TWO WORDS** from the passage for each answer.

The purple range of colours plays an essential role in colour therapy, a form of 11 Colour therapy is said to have originated many years ago in 12 and is still used by colour therapists such as Julia Kubler, who uses it to 13 with various health issues. According to Kubler, purple 14 aspects of two colours, making it both active and passive.

COMPLETE IELTS - UNIT 7 - WRITING

Relationships at work
(survey of workers 2005 & 2009)

The charts below show the results of surveys in 2005 and 2009 asking workers about their relationships with their supervisors and their co-workers.

Summarise the information by reporting the main features, and make comparisons where relevant.

COMPLETE IELTS (6.5 – 7.5 STB) - UNIT 2 - LISTENING

Questions 1–6

Complete the table below.

Write **ONE** word for each answer.

Eye for Colour Exhibition

Section	Aim	Examples of activities
'Seeing colour'		view the gallery through a huge 1
'Colour in culture'	to connect colour and 2	- go to the colour café - learn how a 3 affects sight
'Colour in nature'	to look at the natural world	- put on a camouflage suit and pick a suitable 4 - see through the eyes of a dog or fish
'The 5 room'	to show how colours make us feel	listen to music as the colours and 6 change

Questions 7–10

Choose **TWO** letters, A–E.

Questions 7–8

Which **TWO** colours were most popular among visitors?

- A blue
- B deep pink
- C lime green
- D purple
- E red

Questions 9–10

Which **TWO** reasons did the children give for selecting their favourite colour?

- A They like wearing it.
- B They notice it more than other colours.
- C It makes them feel relaxed.
- D It has a connection with a sport.
- E Someone they admire wears it.
