Label the diagram to show the process of the Water Cycle.

Identify which body of water is being described in each statement.

	This is a flowing body of water in between lands that lead to an ocean or sea.
	This is a standing body of water surrounded by land.
	A body of water found underground.
	It is a portion of the ocean that penetrates the land.
	This is a body of salt water that is partially surrounded by land and is smaller and less enclosed than a gulf.
