☐

4. Read and complete.

A _____ is where plants and animals live, grow and reproduce. It can be _____ or aquatic.

5. Label the pictures with the names of the habitats.

6. Read and complete. Use the words in the box.

lakes marine aquatic freshwater oceans

_____ habitats are dominated by water. Depending on the quantity of salt in the water, they can be _____ habitats or marine habitats. Rivers and _____ are freshwater habitats. _____ and seas are _____ habitats.

7. Read and match.

Gills ●

Fins ●

Scales ●

● The fish uses these for swimming.

● The fish uses these for breathing.

● Fish have these on their bodies.

8. Read the sentences. Choose the correct option.

- Hot deserts are *cold and wet* / *large and dry* places.
- In hot deserts many animals are active *at night* / *during the day*.
- Cold deserts *have snow* / *are sandy*.

9. Classify these animals. Match each animal with the habitat.

Cold desert

Hot desert

10. How do animals adapt to their environment? Read and match.

Regulating temperature ●

Getting food ●

Hiding from predators ●

11. Choose the characteristics of rainforests.

- A. They are warm.
- B. They have a lot of rain.
- C. There is a lot of grass, but there are not lot of trees.

12. Write True (T) or False (F).

- Herbivores feed on animals.
- Omnivores feed on plants and animals.
- Carnivores feed on other animals.

☐☐☐

13. Which of these animals live in the savannah?
