

Els cossos geomètrics

1. Arrossega cada part al seu lloc corresponent:

2. Posa el número correspondiente a cada cas:

	Caras	Vértices	Aristas
<input type="text"/>	<input type="text"/>	<input type="text"/>	
Vèrtexs + cares = aristes + 2			

	Cares	Vèrtexs	Arestes
<input type="text"/>	<input type="text"/>	<input type="text"/>	
Vèrtexs + cares = arestes + 2			

	Cares	Vèrtexs	Arestes
<input type="text"/>	<input type="text"/>	<input type="text"/>	
Vèrtexs + cares = arestes + 2			

	Cares	Vèrtexs	Arestes
<input type="text"/>	<input type="text"/>	<input type="text"/>	
Vèrtexs + cares = arestes + 2			

3. Calcula el volum i la capacitat de cada figura:

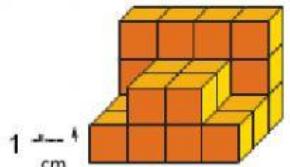

Volumen = ✓

Capacidad = ✓

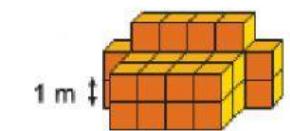

Volumen = ✓

Capacidad = ✓

Volumen = ✓

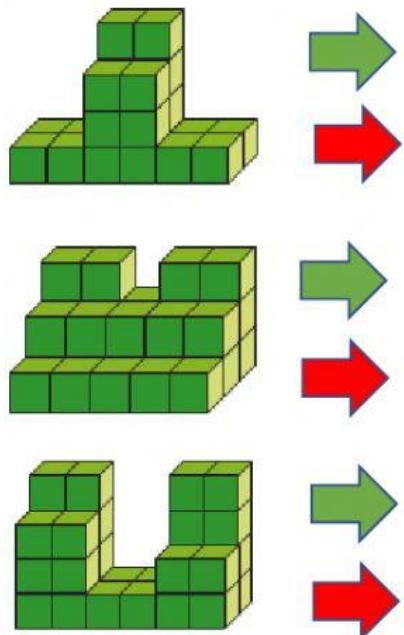

Capacidad = ✓

Volumen = ✓

Capacidad = ✓

4. Relaciona cada figura amb les expressions del seu volum:

$$\begin{matrix} \textcolor{green}{1} & \textcolor{red}{2} \\ \textcolor{green}{\square} & = \textcolor{red}{\square} \end{matrix}$$

Volumen = 29

Volumen = 88

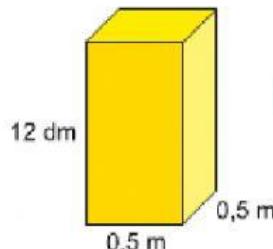

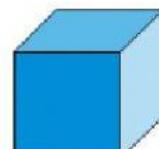

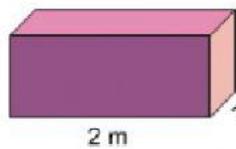

Volumen = 30

Volumen = 120

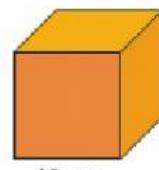

Volumen = 116

Volumen = 22

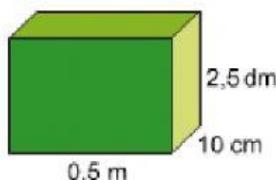

5. Calcula el volum de cada cos i escull l'opció correcte

1

三

v

6. Ordena de menor a major els metres cúbics:, arrossegant el cartell corresponent al seu lloc:

26 cm³

0,5 m³

32 dm³

5 m³

6 dm³

149 cm³
