Predator ●

Prey ●

Column B

- An animal that is hunted by a predator.
- An animal that eats only plants.
- An animal that hunts another animal for food.
- An animal that eats other animals.
- A consumer that eats both plants and animals.
- A diagram that shows how energy gets used in a food chain.
- The path of food from one living thing to another

Answer the following question using your words. You can use the help of the PPT's the teachers send to you.

1. Imagine that every night you can observe an owl catching a mouse. Explain how the owl gets energy that came from the sun, even though it hides in the dark shadows during the day.
