

Loss of Biodiversity Review

1. Tick the words that cause a loss of biodiversity.

Recycling	Hunting	Producer	Deforestation
Decomposer	Endangered species	Extinct	Pollution
Overpopulation	Global warming	Invasive species	

2. Using the words from activity 1 above, match them to their definitions below.

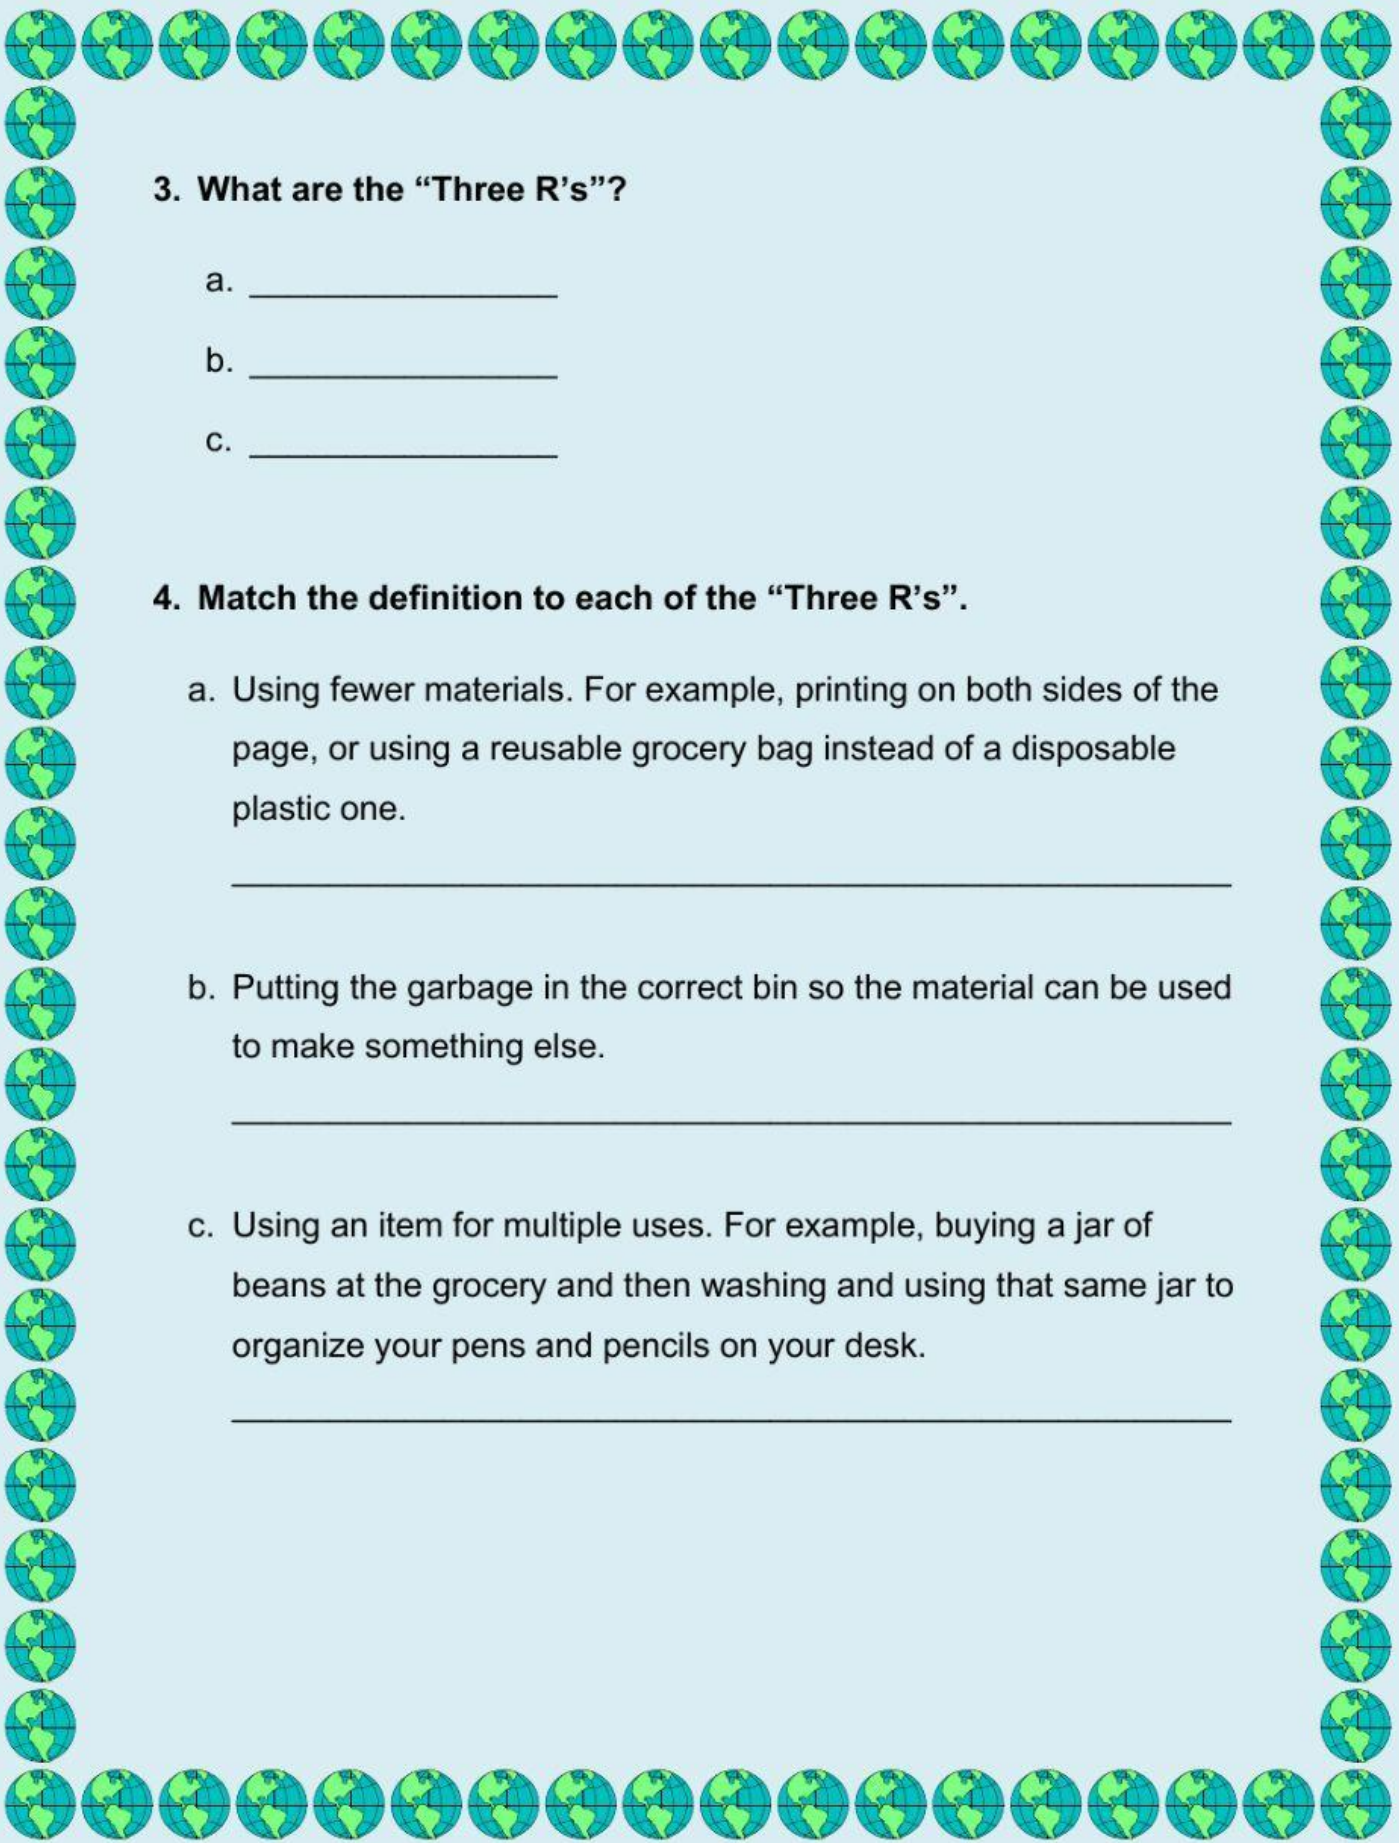

a. This word describes a species that no longer exists.

b. These organisms live on all of the remains of other living organisms.

c. This occurs when forests are cut down.

d. These living things make their own food.

e. This word describes animals that are at risk of extinction.

3. What are the “Three R’s”?

a. _____

b. _____

c. _____

4. Match the definition to each of the “Three R’s”.

a. Using fewer materials. For example, printing on both sides of the page, or using a reusable grocery bag instead of a disposable plastic one.

b. Putting the garbage in the correct bin so the material can be used to make something else.

c. Using an item for multiple uses. For example, buying a jar of beans at the grocery and then washing and using that same jar to organize your pens and pencils on your desk.
