

Name: _____

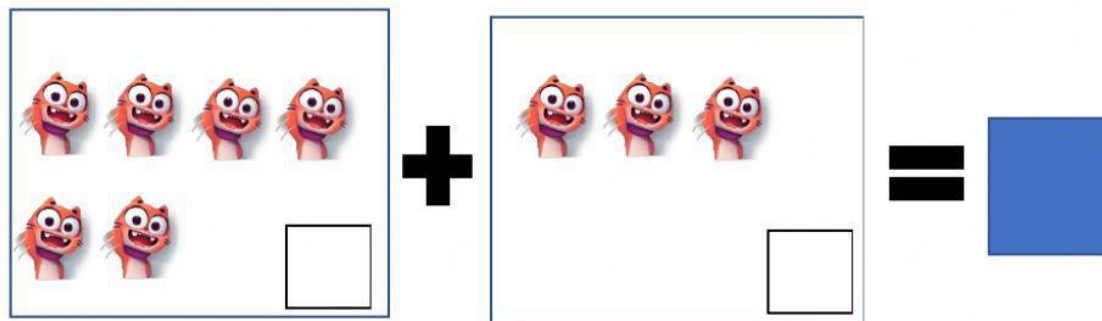

I spy and count to 10

Count each object and work out the answers. Good luck!!

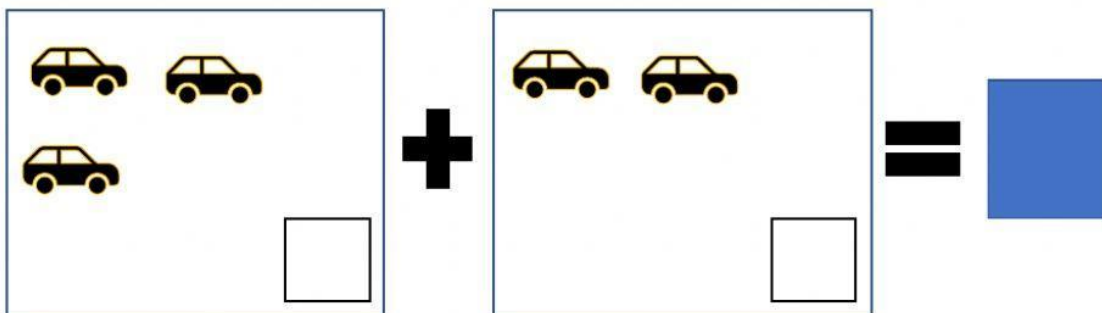

A visual addition problem. The first box contains 2 pink flowers with yellow centers and smiling faces. The second box contains 4 identical pink flowers. Each box has a small empty square at the bottom right for the answer. A plus sign is between the boxes, and an equals sign is followed by a larger empty square for the final answer.

$$2 + 4 = \square$$

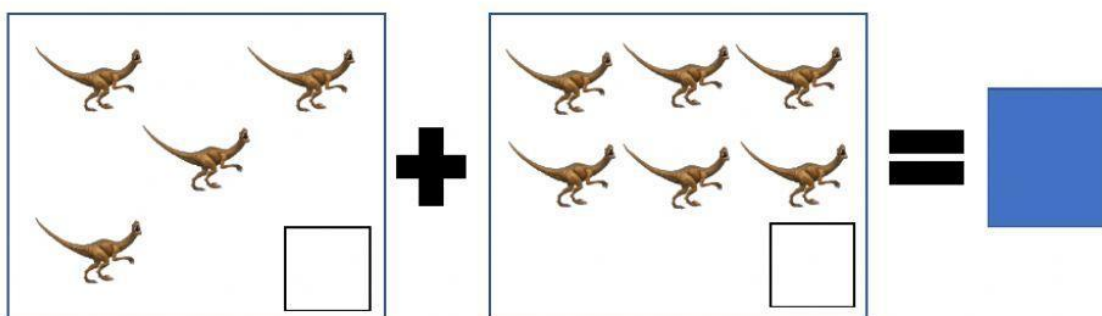

A visual addition problem. The first box contains 6 orange cats with large eyes and purple collars, arranged in two rows of three. The second box contains 3 identical orange cats in a single row. Each box has a small empty square at the bottom right for the answer. A plus sign is between the boxes, and an equals sign is followed by a larger empty square for the final answer.

$$6 + 3 = \square$$

A visual addition problem. The first box contains 3 black cars, with two in the top row and one in the bottom row. The second box contains 2 identical black cars in a single row. Each box has a small empty square at the bottom right for the answer. A plus sign is between the boxes, and an equals sign is followed by a larger empty square for the final answer.

$$3 + 2 = \square$$

A visual addition problem. The first box contains 4 brown dinosaurs in various poses. The second box contains 6 identical brown dinosaurs arranged in two rows of three. Each box has a small empty square at the bottom right for the answer. A plus sign is between the boxes, and an equals sign is followed by a larger empty square for the final answer.

$$4 + 6 = \square$$
