

# WORD PROBLEM WITH BAR MODELS 1

A 3D printer costs \$1,050. It costs \$150 less than a laptop.

- How much does the laptop cost?
- How much do both items cost in all?

a) \$            \$ 150 = \$

The laptop costs \$ .

b) \$ 1,050    \$       = \$

Both items cost \$            in all.
