

1. Write the fractions of the shaded parts.

2. Calculate.

$$\frac{2}{10} + \frac{1}{10} =$$

$$\frac{1}{5} + \frac{2}{5} =$$

$$\frac{3}{5} + \boxed{} = 1$$

$$\frac{1}{8} + \frac{4}{8} =$$

$$\frac{5}{10} - \frac{2}{10} =$$

$$\frac{3}{8} + \boxed{} = 1$$

$$\frac{5}{7} - \frac{2}{7} =$$

$$\frac{2}{5} + \frac{2}{5} =$$

$$\frac{1}{7} + \boxed{} = 1$$

$$\frac{3}{12} + \frac{1}{12} =$$

$$\frac{4}{5} - \frac{1}{5} =$$

$$\frac{4}{5} + \boxed{} = 1$$

Missing Numerators

Name: _____ Class: _____

Fill in the missing numerators

$$\frac{\boxed{1}}{\boxed{2}} = \frac{\boxed{}}{\boxed{4}} = \frac{\boxed{}}{\boxed{8}}$$

$$\frac{\boxed{2}}{\boxed{4}} = \frac{\boxed{}}{\boxed{2}} = \frac{\boxed{}}{\boxed{6}}$$

$$\frac{\boxed{3}}{\boxed{9}} = \frac{\boxed{}}{\boxed{3}} = \frac{\boxed{}}{\boxed{12}}$$

$$\frac{\boxed{6}}{\boxed{9}} = \frac{\boxed{}}{\boxed{3}} = \frac{\boxed{}}{\boxed{6}}$$

$$\frac{\boxed{6}}{\boxed{12}} = \frac{\boxed{}}{\boxed{6}} = \frac{\boxed{}}{\boxed{2}}$$

$$\frac{\boxed{5}}{\boxed{10}} = \frac{\boxed{}}{\boxed{2}} = \frac{\boxed{}}{\boxed{6}}$$

Simplify the Fractions

Finding a fraction of a number

Think carefully when finding these fractions of numbers. Remember to always find one fraction of the number first e.g $\frac{1}{5}$ of 15 = 3,.

$$\frac{1}{4} \text{ of } 8 =$$

$$\frac{1}{5} \text{ of } 25 =$$

$$\frac{1}{5} \text{ of } 35 =$$

$$\frac{1}{3} \text{ of } 21 =$$

$$\frac{1}{4} \text{ of } 28 =$$

$$\frac{1}{2} \text{ of } 6 =$$

$$\frac{1}{8} \text{ of } 24 =$$

$$\frac{1}{5} \text{ of } 40 =$$

$$\frac{2}{3} \text{ of } 9 =$$

$$\frac{2}{3} \text{ of } 48 =$$

$$\frac{5}{8} \text{ of } 48 =$$

$$\frac{3}{4} \text{ of } 16 =$$

$$\frac{3}{5} \text{ of } 40 =$$

$$\frac{2}{3} \text{ of } 15 =$$

$$\frac{3}{4} \text{ of } 8 =$$

$$\frac{2}{3} \text{ of } 24 =$$

$$\frac{1}{3} \text{ of } 18 =$$

$$\frac{2}{3} \text{ of } 18 =$$

$$\frac{3}{3} \text{ of } 18 =$$

$$\frac{1}{3} \text{ of } 15 =$$

$$\frac{1}{4} \text{ of } 28 =$$

$$\frac{2}{4} \text{ of } 28 =$$

$$\frac{3}{4} \text{ of } 28 =$$

$$\frac{4}{4} \text{ of } 28 =$$

$$\frac{1}{5} \text{ of } 30 =$$

$$\frac{2}{5} \text{ of } 30 =$$

$$\frac{3}{5} \text{ of } 30 =$$

$$\frac{4}{5} \text{ of } 30 =$$
