

Look at this average yearly temperature graph for two cities.

It shows the temperatures in °C for each city, every month of the year

Your task: Use the line graph to answer the questions below

Which city had the highest temperature?	
What was it? When did it occur?	
Which city had the lowest temperature?	
What was it? When did it occur?	
What is the difference between the temperature in Juneau and the temperature in Dubai in August?	

Reasoning:

Which city has the widest variation in temperature over the course of a year?

Explain how you know this.
