

## Forms of Energy

1. C\_\_\_\_\_ energy: this type is s\_\_\_\_\_ in some s\_\_\_\_\_. For example, in p\_\_\_\_\_ in the form of c\_\_\_\_\_. When you eat something, your b\_\_\_\_\_ receives the energy from the food. C\_\_\_\_\_ energy can be stored in b\_\_\_\_\_. For example, a m\_\_\_\_\_ p\_\_\_\_\_ uses the c\_\_\_\_\_ energy in a b\_\_\_\_\_ to make calls.

2. E\_\_\_\_\_ energy: this is the m\_\_\_\_\_ of charged particles between t\_\_\_\_\_ different places. For example, t\_\_\_\_\_ use e\_\_\_\_\_ energy. E\_\_\_\_\_ travels to homes and factories through metal cables. We use e\_\_\_\_\_ in machines, like c\_\_\_\_\_ and m\_\_\_\_\_.

3. T\_\_\_\_\_ energy: this is the m\_\_\_\_\_ of the a\_\_\_\_\_ in an object or substance. H\_\_\_\_\_ and t\_\_\_\_\_ increase with an increase of these m\_\_\_\_\_. When an object releases h\_\_\_\_\_, it cools down. We use h\_\_\_\_\_ to heat buildings and c\_\_\_\_\_ f\_\_\_\_\_.

4. N\_\_\_\_\_ energy: this is stored in the a\_\_\_\_\_ s\_\_\_\_\_ of all matter. Scientists release this energy by b\_\_\_\_\_ d\_\_\_\_\_ radioactive materials, such as u\_\_\_\_\_. In n\_\_\_\_\_ power stations, this energy is transformed into the electrical energy that we use in our homes and cities.

5. R\_\_\_\_\_ energy: this is in the form of e\_\_\_\_\_ waves. L\_\_\_\_\_ is an example. The S\_\_\_\_\_ produces r\_\_\_\_\_ energy. We use light energy in t\_\_\_\_\_, c\_\_\_\_\_ and c\_\_\_\_\_.

6. S\_\_\_\_\_ energy: is made by v\_\_\_\_\_ travelling through the air, a liquid or a solid object. They make our e\_\_\_\_\_ vibrate so we hear the s\_\_\_\_\_.

7. M\_\_\_\_\_ energy: energy that produces m\_\_\_\_\_, it enables people and things to go faster and change direction. We use this type of energy when we r\_\_\_\_\_ a bike or p\_\_\_\_\_ a shopping trolley.

K\_\_\_\_\_ energy: comes from the m\_\_\_\_\_ of an object. For example, a b\_\_\_\_\_ transforms the energy from your m\_\_\_\_\_ into k\_\_\_\_\_ energy.

P\_\_\_\_\_ energy: comes from the p\_\_\_\_\_ of an object. For example, when you l\_\_\_\_\_ an object, you give it this energy. When something is at a h\_\_\_\_\_ location, it has this energy.
