

Name: _____ Class: _____ Date: _____ Teacher: _____

Read the passage below. Use the bolded words to label the shark tiger shark.

Every genius knows...

When sharks lose their **teeth**, they grow new ones. A tiger shark's **nose** can smell blood in the water from far away. Fish have gills. **Gills** are on the side of the body and help them breathe. On top of the shark is the **dorsal fin**. The dorsal fin helps sharks move left and right. A shark's tail is called the **caudal fin**.
