

Internet Safety: Five Tips on How to Use the Internet Safely

Match the main ideas with the supporting ideas.

Main Idea		Supporting Idea	
	Do not open links in emails from strangers	*	People can pretend to be you online.
	Do not give out personal information about your family, friends or yourself.	*	You may download computer virus that can harm your computer or steal your personal information.
	Do not tell anyone your password.	*	Any comment or image you post online may be embarrassing or hurtful. Only post what is kind.
	Never meet anyone whom you have chatted with online without your parent's permission.	*	You may expose yourself to serious risks such as cybercrime and harassment.
	Think before you post.	*	The person we only meet online is still a stranger, he or she maybe meet you for bad intentions.
