

姓名: _____

植物的繁殖技术

帮助较弱的植物繁殖

植物某部分

保存母树的优良品质

组织培养

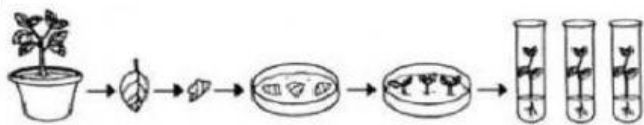

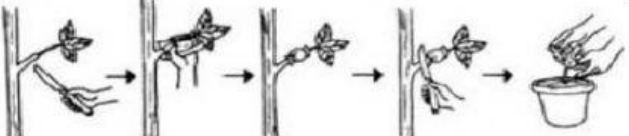

高枝压条法

长出根后

母树分离

树皮剥掉

人们应用一些技术_____, 可以_____, 创造新的品种。

* _____ 使用_____的组织进行培养, 以培植出新的幼苗	 The diagram illustrates the tissue culture process. It starts with a plant in a pot, followed by a single leaf, then a small piece of the leaf, then a petri dish containing several small explants, then another petri dish showing the explants growing into small plantlets, and finally three test tubes, each containing a small plantlet.
* _____ 把分枝的_____并包上土壤, 待_____再与_____、重新种植	 The diagram illustrates the layering process. It shows a sequence of five steps: 1. A branch being bent down from a tree. 2. The branch being buried in the soil. 3. The branch being secured to the soil with a peg. 4. The branch growing roots while still attached to the parent tree. 5. The rooted branch being cut from the parent tree and planted in a pot.
