

WILD ANIMALS

Wild animals live on their own. They don't need help from people.

They live in their natural habitats. In their habitats, wild animals

find four important things: food, shelter, air and water.

There are lots of different habitats for different _____:

✓ In the savannah there are zebras, giraffes, elephants and

_____. But there aren't many trees.

✓ In the ice, there are seals, penguins and _____

_____. You can see white ice and snow everywhere, but there aren't any plants.

✓ Snakes, lizards and _____ live in the desert. This place

is always very hot and dry. It never rains in the desert.

✓ Whales, _____ and octopuses live in the sea. They are aquatic animals. They all eat small fish and seals, too. |

✓ We can find birds in many different habitats. The jungle is full of _____. The forest is full of _____.
