

1 Read the article about marriage and dating.

IS MARRIAGE CHANGING?

Forty years ago, most people got married in their early twenties. But today, people often wait until they are older to get married. What caused this change? Read the information about **dating** and **marriage** and **find out**.

In the past, men usually had better jobs than women. Many women got married early, had children and stayed at home. Today, many young women study at university and get better jobs than women could get in the past. Because of this, many women want to work. They don't want to stay at home. They have also got more money to spend on travel, hobbies and interests **outside** the home.

Dating is different now, too. Forty years ago, young people went out more in the evenings. There was always a party or a place to go dancing, so it was easier to meet people. People often **fell in love** and got married at a very young age. But today, Internet dating websites are popular ways to meet people. These sites can often match people's interests and personalities and people can choose their future **husbands** and **wives** more carefully.

Are these changes good? Well, according to some studies in the USA and in England, there aren't as many divorces in recent years. So, some people think these changes are good. What do you think?
