

MATHS:

a)

$$\begin{array}{c} 1 \times 5 = 5 \\ 5 \div 5 = \square \end{array}$$

b)

$$\begin{array}{c} 2 \times 5 = 10 \\ 10 \div 5 = \square \end{array}$$

c)

$$\begin{array}{c} 3 \times 5 = 15 \\ 15 \div 5 = \square \end{array}$$

d)

$$\begin{array}{c} \square \times 5 = 35 \\ 35 \div 5 = \square \end{array}$$

e)

$$\begin{array}{c} \square \times 5 = 25 \\ 25 \div 5 = \square \end{array}$$

f)

$$\begin{array}{c} \square \times 5 = 45 \\ 45 \div 5 = \square \end{array}$$

g)

$$\begin{array}{c} \square \times 5 = 20 \\ 20 \div 5 = \square \end{array}$$

h)

$$\begin{array}{c} \square \times 5 = 30 \\ 30 \div 5 = \square \end{array}$$

MATHS:

a) $\square \times 10 = 50$  $50 \div 10 = \square$

b) $\square \times 10 = 60$  $60 \div 10 = \square$

c) $\square \times 10 = 70$  $70 \div 10 = \square$

d) $\square \times 10 = 10$  $10 \div 10 = \square$

e) $10 \times \square = 30$  $30 \div 10 = \square$
