*heterotrophs /consumer/ omnivores /energy / materials/ herbivores/ carnivores*

Animals are consumers. A \_\_\_\_\_ is an organism that needs to get energy from another organism. Unlike plants, animals must consume food to get the \_\_\_\_\_ and \_\_\_\_\_ they need to survive. Animals are HETEROTROPHS. A \_\_\_\_\_ is an organism that feeds on, or consumes, other organisms. By definition, animals are, quite simply, multicellular organisms that have adaptations that allow them to take in and process food. Animals can be grouped by the type of food they eat. \_\_\_\_\_ feed on plants or algae. \_\_\_\_\_ feed on other animals. \_\_\_\_\_ feed on both plants and animals
