

CENTRO ESCOLAR ALTAVISTA

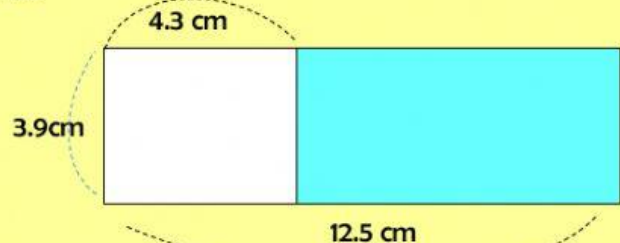

NOMBRE: _____ 5º GRADO _____

ACTIVIDAD EVALUADA: PROPIEDAD DISTRIBUTIVA Y OPERACIONES COMBINADAS

1. Calcula el área sombreada de las siguientes figuras:

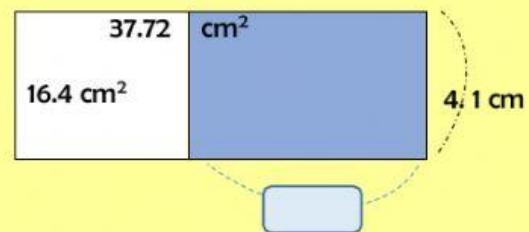

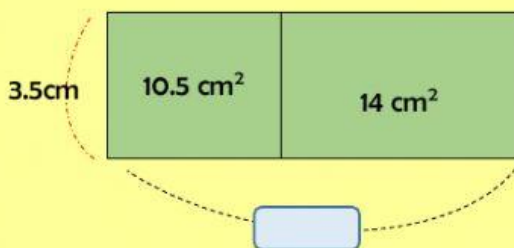

Área sombreada cm²

Área sombreada cm²

2. Calcula el largo de la figuras sombreadas:

3. Realiza las siguientes operaciones aplicando la propiedad distributiva:

$$(8 + 6.72) \div 3.2$$

$$\left(\frac{\boxed{}}{\boxed{}} \div \frac{\boxed{}}{\boxed{}} \right) + \left(\frac{\boxed{}}{\boxed{}} \div \frac{\boxed{}}{\boxed{}} \right)$$

$$\boxed{} + \boxed{}$$

$$\boxed{}$$

$$(9.5 \div 4.2) - (3.2 \div 4.2)$$

$$= \left(\frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} \right) \div \boxed{}$$

$$= \left(\frac{\boxed{}}{\boxed{}} \right) \div \boxed{} = \boxed{}$$

$$(2.9 + 1.1) \times 5.4$$

$$\left(\frac{\boxed{}}{\boxed{}} \times \frac{\boxed{}}{\boxed{}} \right) + \left(\frac{\boxed{}}{\boxed{}} \times \frac{\boxed{}}{\boxed{}} \right)$$

$$\boxed{} + \boxed{}$$

$$\boxed{}$$

$$(9.7 \times 4.6) - (3.7 \times 4.6)$$

$$= \left(\frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} \right) \times \boxed{}$$

$$= \left(\frac{\boxed{}}{\boxed{}} \right) \times \boxed{} = \boxed{}$$

4. Efectúa y escribe el proceso que realizaste

$9 \times (1 + 18 \div 3) = \boxed{} \text{ ① } \underline{\hspace{2cm}}$ $= \boxed{} \text{ ② } \underline{\hspace{2cm}}$ $= \boxed{} \text{ ③ } \underline{\hspace{2cm}}$	$16 \div 2.5 - (2 \times 2) = \boxed{} \text{ ① } \underline{\hspace{2cm}}$ $= \boxed{} \text{ ② } \underline{\hspace{2cm}}$ $= \boxed{} \text{ ③ } \underline{\hspace{2cm}}$
