4. Leé el texto y corrige las oraciones. TODAS son falsas. (5/5=25)

A long time ago, tramways were a popular means of transport. They were used for travelling short distances in cities. They were cheap but had a disadvantage, their routes were fixed. There were taxis too, but they were very expensive. One day, a new vehicle was created. It was called colectivo, or buses in English. It was a mixture of a tramway and a taxi. It was invented by the argentinians Angel di Cesare and Alejandro Castelv in 1928. They are used for travelling long and short distances.

A long time ago buses were a popular means of transport.

Taxis were very cheap

The colectivo was a mixture of truck and bike.

It was invented in Brazil.
